

Pynance Acceptance Testing Report

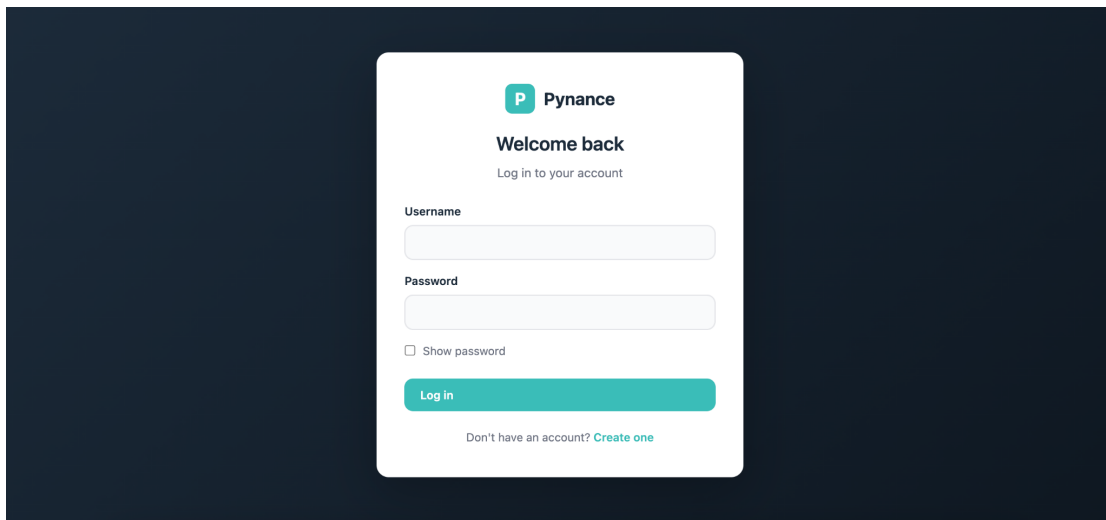

This document presents the execution of acceptance test cases for the Pynance Personal Cash Flow Management System. The screenshots below demonstrate the successful execution of major system features and interfaces.

Test Case 1: Authentication – User Login

Description: Verified that registered users can securely log into the system using valid credentials.

Expected Result: User should be authenticated and redirected to the dashboard.

Actual Result: Login executed successfully and system access was granted.

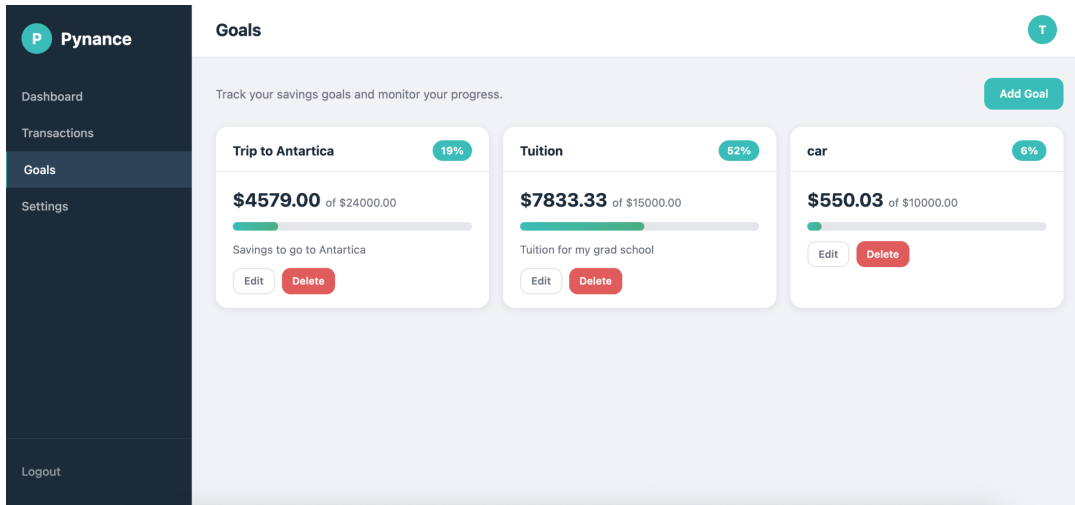

Test Case 2: Goals Management

Description: Verified that users can create and monitor savings goals with dynamic progress tracking.

Expected Result: Goals should display target amount, saved amount, and completion percentage.

Actual Result: Goals page rendered correctly with progress indicators and management actions.

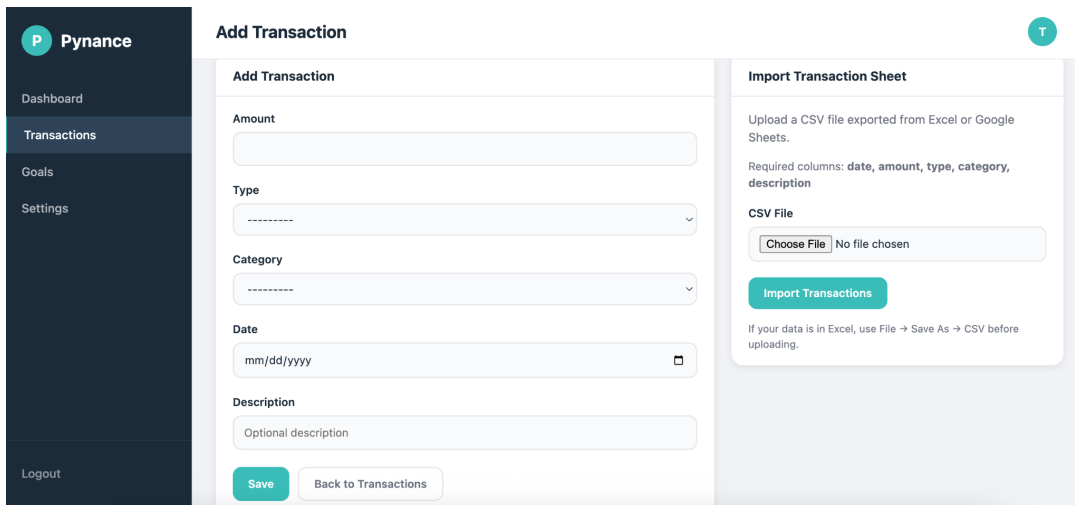

Test Case 3: Transaction Management and CSV Import

Description: Verified that users can manually add transactions and upload transaction data through CSV files.

Expected Result: Transactions should be accepted through forms and CSV import should process valid files successfully.

Actual Result: Transaction form and CSV upload functionality operated successfully.

Test Case 4: Dashboard Analytics and Visualization

Description: Verified that financial summaries and graphical visualizations are generated correctly.

Expected Result: Dashboard should display balances, charts, summaries, and recent transactions.

Actual Result: Dashboard analytics and charts rendered successfully with accurate financial data.
