

Pynance UML Diagrams Report

This document contains the primary UML diagrams developed for the Pynance Personal Cash Flow Management System. These diagrams illustrate the structure, behavior, workflows, and interactions within the application.

Figure 1: Use Case Diagram

The Use Case Diagram illustrates the interactions between the user and the major functionalities of the Pynance system, including authentication, transaction management, dashboard access, and goal tracking.

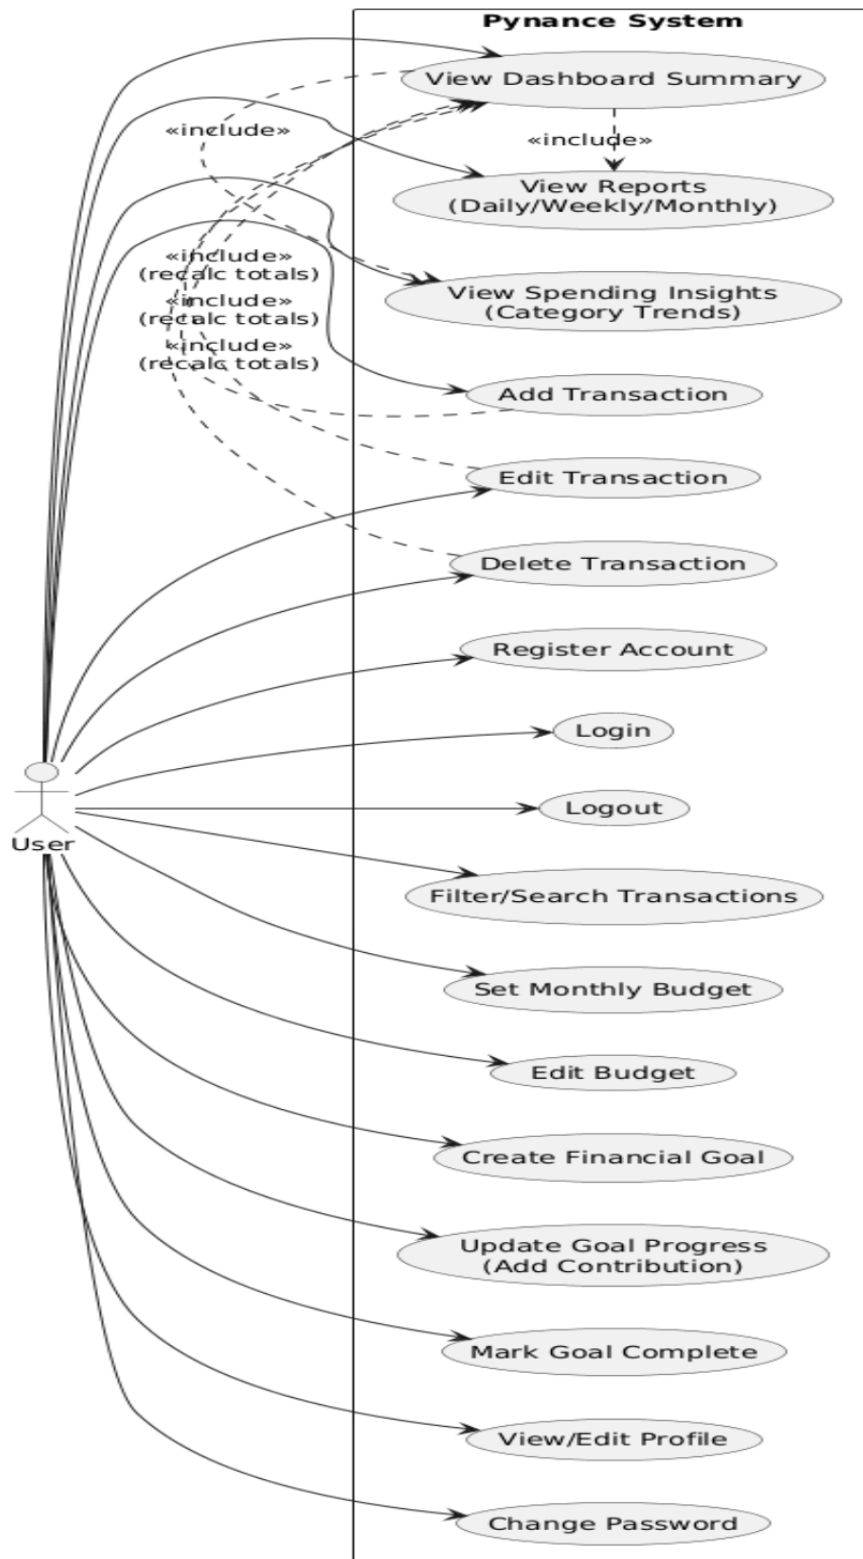

Figure 1: Use Case Diagram for Pynance

Figure 2: Activity Diagram

The Activity Diagram represents the workflow of the application, including registration, login validation, navigation, transaction processing, goal management, and logout flow.

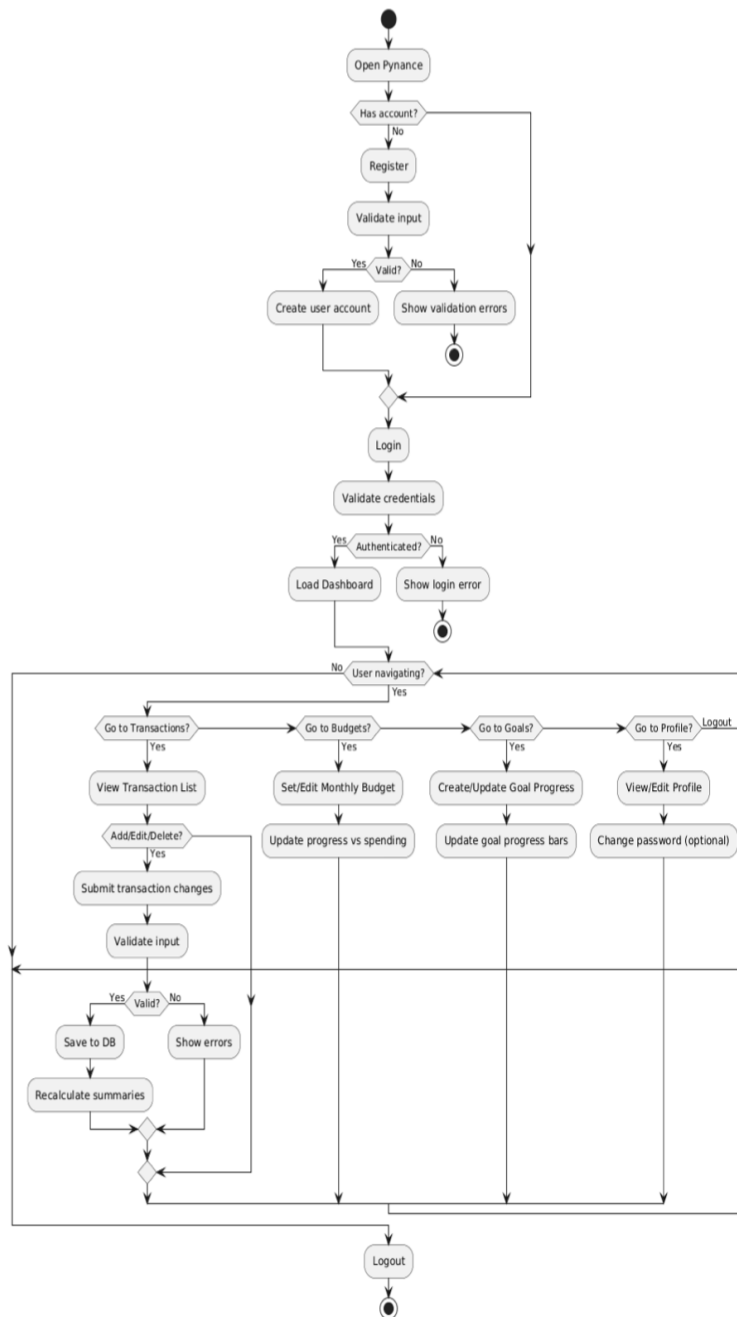

Figure 2: Sequence Diagram – User Login

This diagram describes the authentication flow between the User, Web Interface, Authentication Controller, and Database.

Figure 3: Sequence Diagram

The Sequence Diagram demonstrates the interaction between the user interface, controllers, services, and database during transaction creation and summary updates.
